.....

We would like to support your work through the BIOTOPIA Lab's diverse range of school workshops. Observation & Understanding, Research & Production, Cooking & Cultivation: Activities designed specifically for school groups convey knowledge vividly and interactively. From microbiology and soil ecology to genetics and nutrition, an exciting museum education programme awaits children and young people from all kinds of schools. The topics are prepared in a form that is relevant to the curriculum and can be extended in a variety of ways. We are happy to accommodate special requirements.

Please be aware that the workshop programme is being constantly adapted to reflect the latest developments around the corona pandemic. The permitted class size is based on the applicable corona regulations. If it is not possible to supervise the entire class in the Lab, we will try to find an alternative programme for those class members who can't join in the Lab.
